

Shoghi Communications Showcases Ultra-Modern Futuristic Technology at East Tech 2023

East Tech 2023 was held at the prestigious Maniram Dewan Trade Centre, Guwahati from 10th to 11th October 2023. It proved to be an extraordinary initiative to identify contemporary and niche technologies for capability enhancement in the Defence Sector. The event enabled enormous interaction of Defence and Paramilitary Forces with the Indian Defence Manufacturers and R&D Organisations. It was aimed to encourage the "Atmanirbhar Bharat", "Raksha Aatmanirbharta" and "Make in India" programmes. The event helped in identifying suitable defence technologies and provided a launch platform to various Startups / MSMEs as well as major players of the Indian Defence Manufacturing Industry with a special focus towards the Eastern Region.

Shoghi Communications Ltd participated wholeheartedly in the two-day East Tech 2023 exhibition. The event witnessed massive participation by the industries in the Defence sector from all over the country. The futuristic EW & Cyber Intelligence products of Shoghi which provide cutting-edge monitoring solutions and processing tools in order to improve intelligence collection were appreciated by the senior hierarchy of Defence Intelligence fraternity.

The enhanced version of the Unified Satellite Phone Monitoring System (USMS) which was showcased to the Army and BSF delegations is designed to intercept all popular satellite phones and locate them on the map, was the showstopper at the event. This system can intercept Voice, SMS and Text traffic from Satellite Phones operating on Thuraya, Iridium and IsatPhone Pro Satellite networks. The geofencing feature allows the agencies to intercept the traffic from all these satellite phones from areas of interest just by drawing a circle on the map. The system is pre-integrated and pre-configured in a compact ruggedized transportable case including a decryptor to provide plain content.

A large number of Indian Manufacturers including MSMEs, DRDO, and DPSUs from all over the country showcased their latest and the most advanced weapon and equipment technology under one roof promoting the Make In India campaign. The event also marked the beginning of a new era in the field of Indigenous Defence technology being provided a platform by the Eastern Command of the Indian Army in a first-of-its-kind event taking place in Guwahati.
